OR32 NIGHT LIGHT 2

For use with OR12L & OR31L Side Planers
(Retail package contains Two Red Lights for the PORT side and
Four 1.5 Volt Batteries)

**COLOR COORDINATED FOR YOU TO COMPLY WITH THE
NAUTICAL RULES OF THE ROAD!**

THE FACTS

- Shock resistant, light emitting diode, never needs replacing.
- Two 1.5 volt batteries; for maximum battery life allow batteries to rejuvenate 2 hours or more after 6-8 hours of continuous use. Store batteries separately when not in use to prolong battery life.
- Made of high impact shatter-resistant plastic.
- New edge glow additive for improved visibility.

TO OPERATE

- $\frac{1}{2}$ turn to right: On
- $\frac{1}{2}$ turn to left: Off

INSTALLATION

- Remove current flag if present by unscrewing the 6/32 screw.
- Attach the OR32 Night Light 2 to your OR12L or OR31L by using the existing screw from step one or you will need to purchase a 6/32 5/8" stainless machine screw to attach the light assembly into the correct hole as shown to the right.

BATTERY LOADING

- While holding the base of the light, unscrew the battery retainer out of light body.
- Stack two 1.5 volt batteries with the plus (+) end facing towards stem.
- Reinstall retainer.
