

OR39

**SAM'S PRO RELEASE
BY SILVER HORDE; WITH
SPLIT RING AND LOCK NUT
BLACK Pkg. of 1**

This in-line planer board release is designed to be used with super lines when you want to "trip" the board. It can be run rigidly on the bracket of the in-line planer board or attached via the included split ring.

OR39

Grab the line from the rod tip and tightly wrap 3-4 times around rubber line holder, then snap the rubber pin into the locked position. Adjust the tension with the adjustment screw as needed.

To trip the release, give it a sharp pull with the rod. The in-line planer board will flip backwards while the OR16 on the tail of the in-line board will keep the in-line board from sliding down the line and potentially knocking the fish off the hook.
