

*"The Original—The Ultimate Release"*

Pkg. of 1

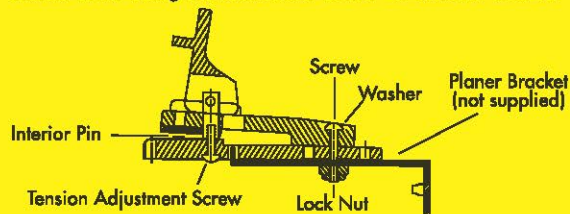

**OR18**

**SNAPPER ADJUSTABLE TENSION  
IN LINE PLANNER BOARD  
RELEASE, BLACK**

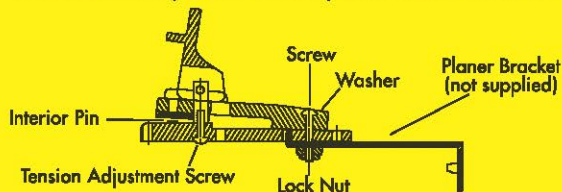

*"Often Imitated, Never Duplicated!"*

This release is made to attach to the bracket of the OR12 or OR37 planer boards by using the lock nut enclosed. You adjust the clamp pressure by tightening or loosening the tension adjustment screw.

Attach OR18 using the center hole on the bracket for OR12's.

Attach OR18 using the hole at the tip of the bracket for OR37's.

## HOW TO USE YOUR SNAPPER RELEASE

Open jaws to receive or release line.

Place the line **BEHIND** the interior pin in the manner above and close jaws by rotating the lever to the forward position. To be able to trip the line free from the release, flip the lever towards the tail of the release and place the line **IN FRONT** of the interior pin as shown below. Adjust tension by the tension screw as needed.

Use ORRP8SN replacement pads.
